Modification page:

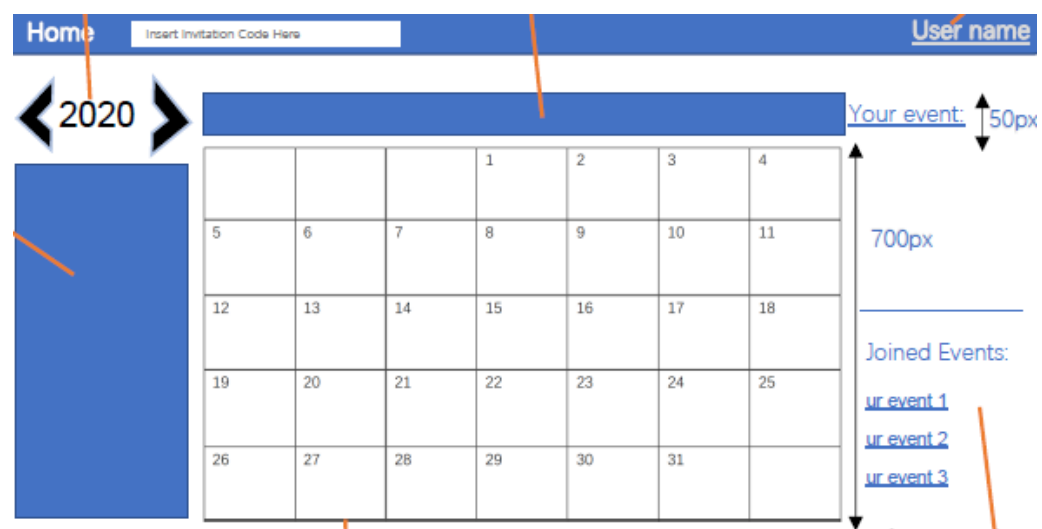

The modification page features a blue header with 'Home', an 'Insert Invitation Code Here' input field, and a 'User Name' link. The main content area is a blue box with a width of 300 px and a height of 600 px. It contains three sections for user modification:

- User Name:** A section with a width of 580 px and a height of 50 px, containing 'New first name' and 'New last name' input fields, and a 'Change name' button.
- Email address:** A section with a 'New email address' input field and a 'Change email' button.
- Password:** A section with a 'New password' input field and a 'Change password' button.

Three orange arrows point to the 'Change name', 'Change email', and 'Change password' buttons, indicating their function.

- **Change name; Change email; Change password:** These three buttons are for altering the information which users' input.

Calendar website:

The calendar website features a blue header with 'Home', an 'Insert Invitation Code Here' input field, and a 'User name' link. The main content area includes a calendar for the year 2020, a 'Your event:' input field, and a 'Joined Events:' section.

The calendar is a 7x5 grid showing days 1 through 31. To the left of the calendar is a blue sidebar. To the right of the calendar is a 'Your event:' input field with a height of 50 px. Below this is a 'Joined Events:' section with three links: 'ur event 1', 'ur event 2', and 'ur event 3'. The calendar grid itself has a height of 700 px.

- **< 2020 >** '2020' which is the current year. It will change by these two arrows symbol.
- **Joined Events:**
 - Ur event 1** Represent the created events and joined
 - Ur event 2** events of the user, they can check the
 - Ur event 3** detail after they clicked.

- **Calendar:** user click any date which they want to select on, it will jump [a window for creating event](#)

This window for input the event name, event time and the content of the event. When creator finished and click the button, it will be confirmed.

After created the event, calendar page will update automatically. Also, there is an event tag, inside the specific date frame, will show up. Here is an example:

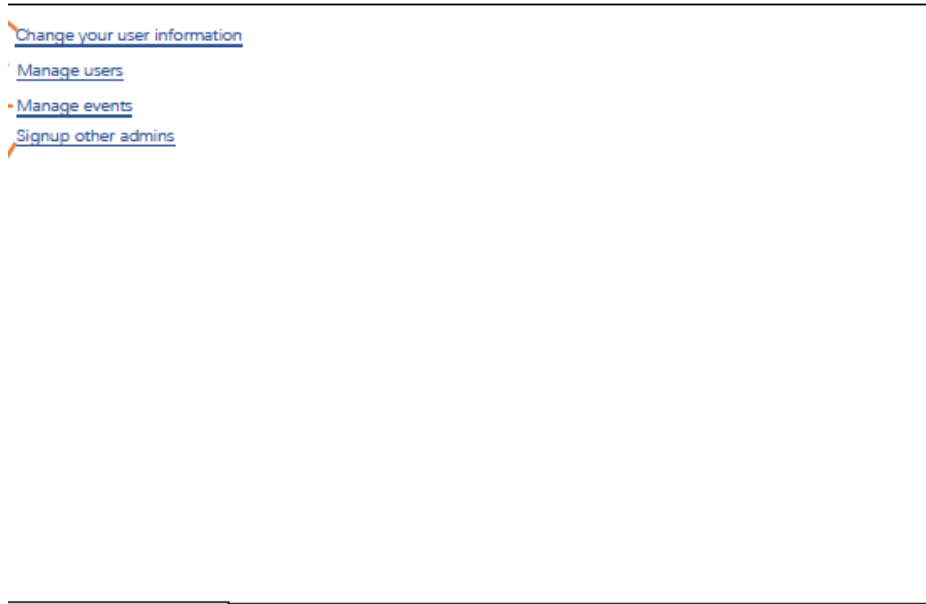

In addition, this tag will pop up to [another window](#) which include Invitation link and event code.

- **Invitation link:** whoever click this link, it will lead them to the event which this link belongs.
- **Check availability:** open a new tab for the user, someone with a desk who declared their availability events. (from the database basically)
- **Finalize event:** finish creating event and send email notification.

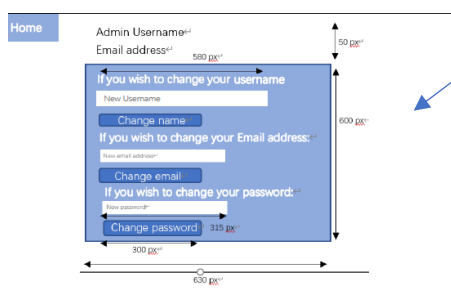

Availability page:

- **Available button** & **Unavailable button**: Using an input different from the placeholder in click in the input box, the user will clarify its availability a specific event. Record available time and the name of the user without an account.

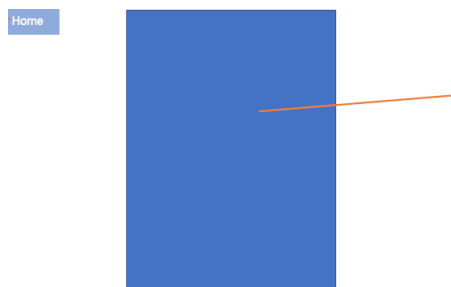

Admin main page:

- **Change your user information**: this link leads to the [admin profile page](#).

- **Manage users** & **manage events**: these links go ahead to the [admin management site](#).

- **Signup other admins:** this direct to the [admin sign-up page](#).
